PREFACE

This scholarly quarterly reference work, which first appeared in January, 1967, provides access—comprehensive, current, selective—to the world's literature in language and language behavior.

- whatever the disciplinary focus
- whatever the country of origin
- whatever the language in which it is written.

Under the auspices of The University of Michigan, LLBA publishes informative English language abstracts of articles as a service to all researchers and practitioners in the various disciplines concerned with the nature and use of language.

LLBA is **COMPREHENSIVE**—almost one thousand publications (periodicals, progress and technical reports, occasional papers, monographs, and conference proceedings) in over thirty languages are now regularly screened.

LLBA is **CURRENT**—each issue contains abstracts of all relevant articles received up to one month prior to the date of publication.

LLBA is **SELECTIVE**—

It exhaustively covers articles that report:

- (1) studies in which the independent or dependent variables, or both, are verbal;
- (2) studies whose experimental design parallels that employed in language studies;
- (3) general theoretical contributions in the twenty-five disciplines listed on the title page; and
- (4) studies influenced by these theoretical contributions.

It generally excludes articles that report:

- (1) studies in any of the twenty-five disciplines that are not of interest to scholars working in any of the other disciplines;
- (2) studies primarily of a popular rather than a scholarly nature; and
- (3) studies whose interest is primarily historical.

In addition to numerically ordered abstracts of articles satisfying the above criteria, each issue of LLBA contains four indices: an author name index, a subject index, a book review index, and a source publication index. Subscription to LLBA includes four issues of abstracts and an annual cumulative index. Issues published prior to 1972 contain only author name and source publication indices, although a four-part cumulative index to the first five volumes (1967-1971) is available.

SOURCE PUBLICATION INDEX	185

Note

There are four separate indices in this annual cumulative index to *Language and Language Behavior Abstracts* Volume VII (1973): author index, subject index, book review index, and source publication index. All references to abstracts contained in *LLBA* are by the abstract number which precedes each abstract.

The *author index* is a name and not a person index. Rules of alphabetization are applied by computer. No attempt has been made to consolidate multiple entries for the same person if his or her name was not listed exactly the same way every time it appeared in the source publications referenced.

The *subject index* contains descriptive phrases intended to provide information about the contents of each article abstracted. This information may include the general subject matter or the dependent variable(s); the independent variable(s); tests; population; and additional information such as book review, case report, conference proceedings, review of the literature, etc.

The *book review index* lists the author(s) and original title for every book of which a review was abstracted.

The *source publication index* includes the full title, subtitle(s), and current subscription address of every publication regularly screened for articles which satisfy the *LLBA* selection criteria outlined in the Preface. In addition, the number of articles abstracted from each source publication, if any, is indicated after the address as an Arabic numeral following the Roman numeral of the volume.
